| Case created | 10 April 2020 (updated 04 May 2020)  |

### Background information

On 14 March 2020 a joint protocol defining measures for the contrast and the containment of the spread of the Covid-19 virus in the workplaces was signed by a wide number of trade unions and employers' associations - including the most important national ones - under the auspices of the Prime Minister, and the Ministers of Economy, Labor, Economic Development and Health. The agreement aims to ensure the protection of workers' health and the necessary safety conditions in all workplaces, in compliance with the indications formulated by the Ministry of Health on risk management of Covid-19 in the workplace. The protocol was renegotiated and revised on 24 April 2020.

### Content of measure

The joint protocol aims to ensure the protection of workers' health and the necessary safety conditions in all workplaces. In particular, the agreement provides that the continuation of production activities can take place only on condition that adequate levels of protection are guaranteed to workers. To facilitate the containment of the virus, the agreement allows to suspend or temporarily reduce the activity, or to adopt the telework (smart working) as much as possible. The agreement also indicates particular containment measures that follow anti-contagion safety protocols (interpersonal distance between workers or adoption of safety devices). Among these measures are:

- the use of smart and remote working schemes for the activities that can be carried out at home or remotely;

- encouraging the use of paid leave also through collective agreements;
- the suspension of the activities of company departments not indispensable for production;
- the adoption of anti-contagion safety protocols, the respect the interpersonal distance of one meter as the main measure of containment, the adoption of individual protection tools (e.g. masks and hand sanitizers);
- the sanitization of workplaces and common areas;
- limiting to the minimum essential the movement of people inside production sites;
- encouraging the negotiation of specific collective agreements for the companies that are still in production;
- the establishment of a company committee with the participation of employees' workplace representatives for monitoring the application of the protocol.

The protocol was renegotiated and revised on 24 April 2020. The main amendments concerned the following issues:

- the non-application of the Protocol - which results in the inability to guarantee adequate levels of protection
- determines the suspension of the activity until conditions of safety are restored
- the supervision of the client company on compliance with the provisions also with regard to the staff of third-party companies operating in the client's premises/construction sites
- attention to the mode of transport to reach the workplace.

## Use of measure

No precise information is available on the extent of application of the protocol, but generalised application can be, since the wide number of organisations that signed it.

## Actors, target groups and funding

| Actors  | Target groups | Funding                     |
|---|---------------|-----------------------------|
| Trade unions<br>Employers' organisations<br>Company / Companies | All companies | No special funding required |

## Social partners

|                         |   |
|-------------------------|---|
| Role of social partners | Agreed (outcome)                        |
| Form of involvement     | Bi-or tripartite social dialogue bodies |

The agreement was signed by the trade unions and the employer associations under the auspices of the Prime Minister, and the Ministers of Economy, Labor, Economic Development and Health.

On 14 March 2020, the President of Confindustria - the main Italian employers' organisation - argued that "the agreement reached today - and we acknowledge that the Government acted timely and the other social

actors with great sense of responsibility - will allow (...) that Italian factories work at the service of the country starting from the agri-food and pharmaceutical supply chains to guarantee all of us the primary goods and protect every production chain. By giving priority attention to the health of people in the workplace, this will also allow us to overcome this delicate phase and prepare for the economic recovery as soon as we get out of it".

The Secretary General of CISL - one of the principal Italian trade unions - expressed satisfaction for the protocol and its revision arguing that "the agreement summarizes the indications of Inail and the National Scientific Technical Committee and at the same time strengthens and expands the contents of the Protocol of 14 March for measures to contrast and contain the spread of the virus in the workplace. After a very long and complex negotiation with the employers' associations, we found a balanced and responsible synthesis through the insertion of very innovative actions and procedures necessary for the improvement of interventions aimed at guaranteeing stable rules and conditions for the safety and health protection of workers. in the workplace".

## Sectors and occupations

This case is not sector-specific.

This case is not occupation-specific.
