Factsheet for case **DK-2020-12/788**

## Expanded monitoring of the labor market

Factsheet generated on 08 May 2020, 07:43

Country	Denmark, applies nationwide
Time period	Temporary, started on 19 March 2020
Type	Legislation or other statutory regulation
Category	Support for essential services – Smoothing frictions or reallocation of workers
Case created	25 April 2020 (updated 07 May 2020)

### Background information

Because of the economic effects of the COVID-19 virus the Danish government has decided to publish daily figures on how the labour market develops, as opposed to periodical numbers. The monitoring of developments in the labor market is updated on a daily basis at [jobindsats.dk](http://jobindsats.dk), including with figures for new vacancies and the recently unemployed. There will also be data once a week spread across industries and job areas.

### Content of measure

The monitoring is done by the Danish Labor Market and Recruitment Agency (Styrelsen for Arbejdsmarked og Rekruttering, STAR).

The labour market report is published every day at 10, except on holidays. The figures relating to layoffs and work allocations are updated weekly. This happens on the 3rd weekday of the week.

The report contains daily information on the amount of registered as unemployed with the authorities. It includes comparisons over time, both during and before the COVID-19 crisis.

Other statistics include:

- reason for unemployment (such as: sickness, dismissal, or other)

- new vacancies registered in "jobnet" (STARs job posting service)

-

## Use of measure

Not applicable
