Factsheet for case PT-2020-10/573

## Ten companies, mainly from moulds and plastics, from Marinha Grande and Leiria, produce goggles for free distribution

Factsheet generated on 05 May 2020, 19:43

Country	Portugal, applies regionally – PT16F Região de Leiria
Time period	Open ended, started on 01 March 2020
Type	Company practice
Category	Re-orientation of business activities – Change of production/innovation
Case created	13 April 2020 (updated 04 May 2020)

### Background information

The Business Association of Leiria Region (Associação Empresarial da Região de Leiria - Nerlei) launched a challenge to the companies operating in the region to contribute to the fight of Covid-19 and produce goggles to be distributed free of cost to all the institutions related to health, civil protection, security services and prison services in the district of Leiria.

Ten companies, mostly from the moulds and plastics sectors, accepted the challenge.

This project, entitled "Por Portugal, todos unidos na região de Leiria", is coordinated by the Polytechnic of Leiria.

### Content of measure

A needs assessment in all the institutions related to health, civil protection, security services and prison services in the district of Leiria showed the need of about 6,000 goggles.

By the end of March 2020, 3,300 goggles, produced by ten local companies usually operating in the moulds and plastics sectors, were already distributed among these institutions, free of charge.

The full target of 6,000 goggles was met on 6 April 2020.

The remaining number of 1,300 goggles will be distributed in the residential care homes for the elderly located in the region, by the municipalities.

Once reached the initial target, the Polytechnic of Leiria faces the possibility to widen the production of goggles to other areas of the country, or to an international level.

Some of the companies involved were already contacted by Belgium and the USA, who showed interest in buying their production of goggles.

## Use of measure

The needs assessment in the region showed the need of a total of about 6,000 goggles.

This target was met and then exceeded.
